Travel and Tourism Website Report

HTML, CSS, browser output, and conclusion from the supplied screenshots

Explore India

The browser screenshot shows a tourism page introducing Indian destinations, historic monuments, and festivals. Its main heading is "Discover the stories of India."

SCREENSHOT MISMATCH

The first screenshot is HTML for IronPeak Fitness Club and the second is its gym CSS. The third screenshot is the Explore India tourism page. These code and output screenshots are from different websites, so the first two do not produce the third image.

TITLE DESCRIPTION

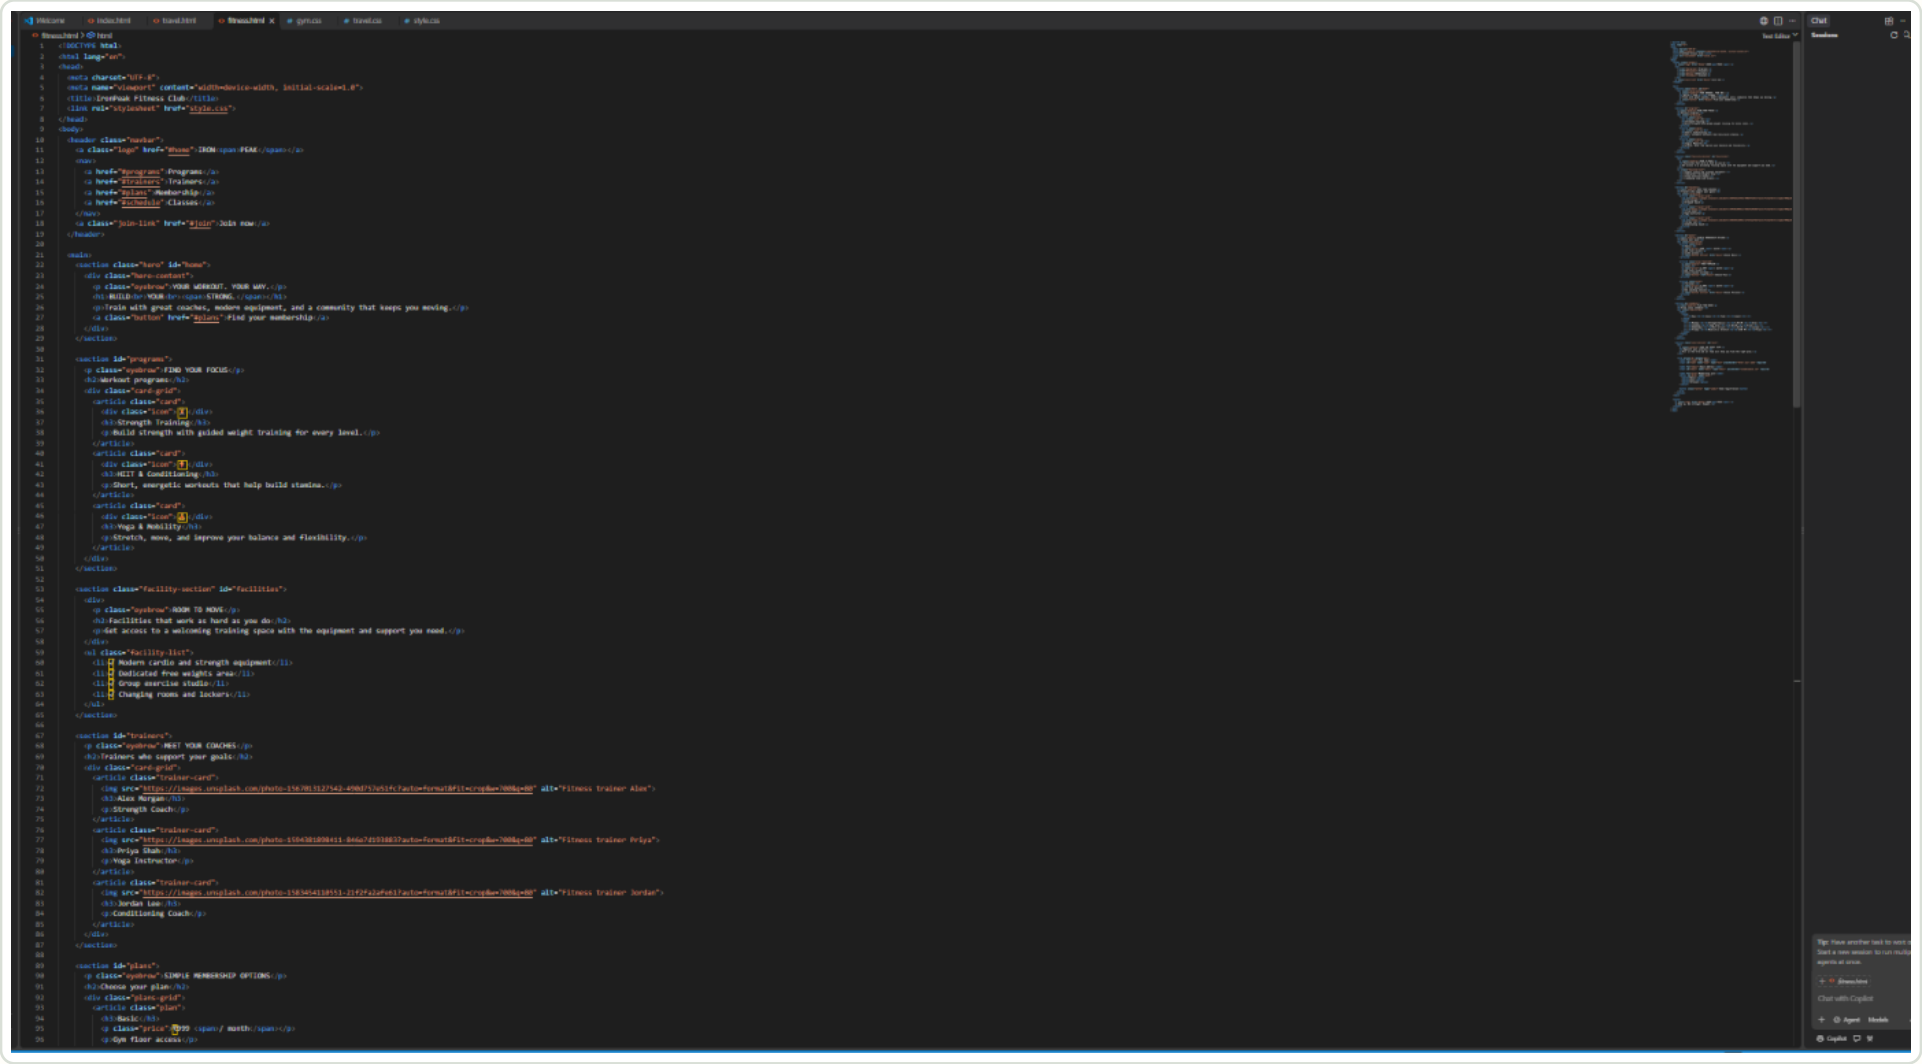

In the supplied HTML screenshot, the browser tab title is "IronPeak Fitness Club". In the tourism output, the visible site name is "Explore India" and the main page heading is "Discover the stories of India." The screenshots do not show the tourism page HTML title tag.

REPORT ORDER

Page 2: HTML screenshot. Page 3: explanation of the visible HTML sections. Page 4: CSS screenshot. Page 5: explanation of the visible CSS rules. Page 6: tourism output. Page 7: conclusion.

1. HTML Code Screenshot

The first supplied image shows the IronPeak Fitness Club HTML file.

The visible code includes the page setup, gym navigation, hero section, workout programs, facilities, trainer cards, and the beginning of membership plans.

HTML Description - Line by Line

Line ranges are approximate, based on the numbers visible in the screenshot.

Lines 1-8 | Document setup

DOCTYPE declares HTML5. The html element sets English as the language. The head contains character and screen-size settings, the tab title IronPeak Fitness Club, and the link to style.css.

Lines 10-19 | Navigation

The header contains the IRONPEAK logo, links for Programs, Trainers, Membership, and Classes, plus a Join now link. Each link points to a section ID on the page.

Lines 21-29 | Hero banner

The hero section contains a short fitness slogan, the large heading BUILD YOUR STRONG, a supporting description, and a button that links to membership plans.

Lines 31-51 | Workout programs

A section introduces three workout cards: Strength Training, HIIT and Conditioning, and Yoga and Mobility. Each card has an icon, heading, and short description.

Lines 53-66 | Facilities

A facility section describes the gym and lists cardio and strength equipment, free weights, a group studio, changing rooms, and lockers.

Lines 68-88 | Trainers

Three trainer cards show image links, alternative image text, names, and roles for Alex Morgan, Priya Shah, and Jordan Lee.

Lines 90 onward | Membership plans

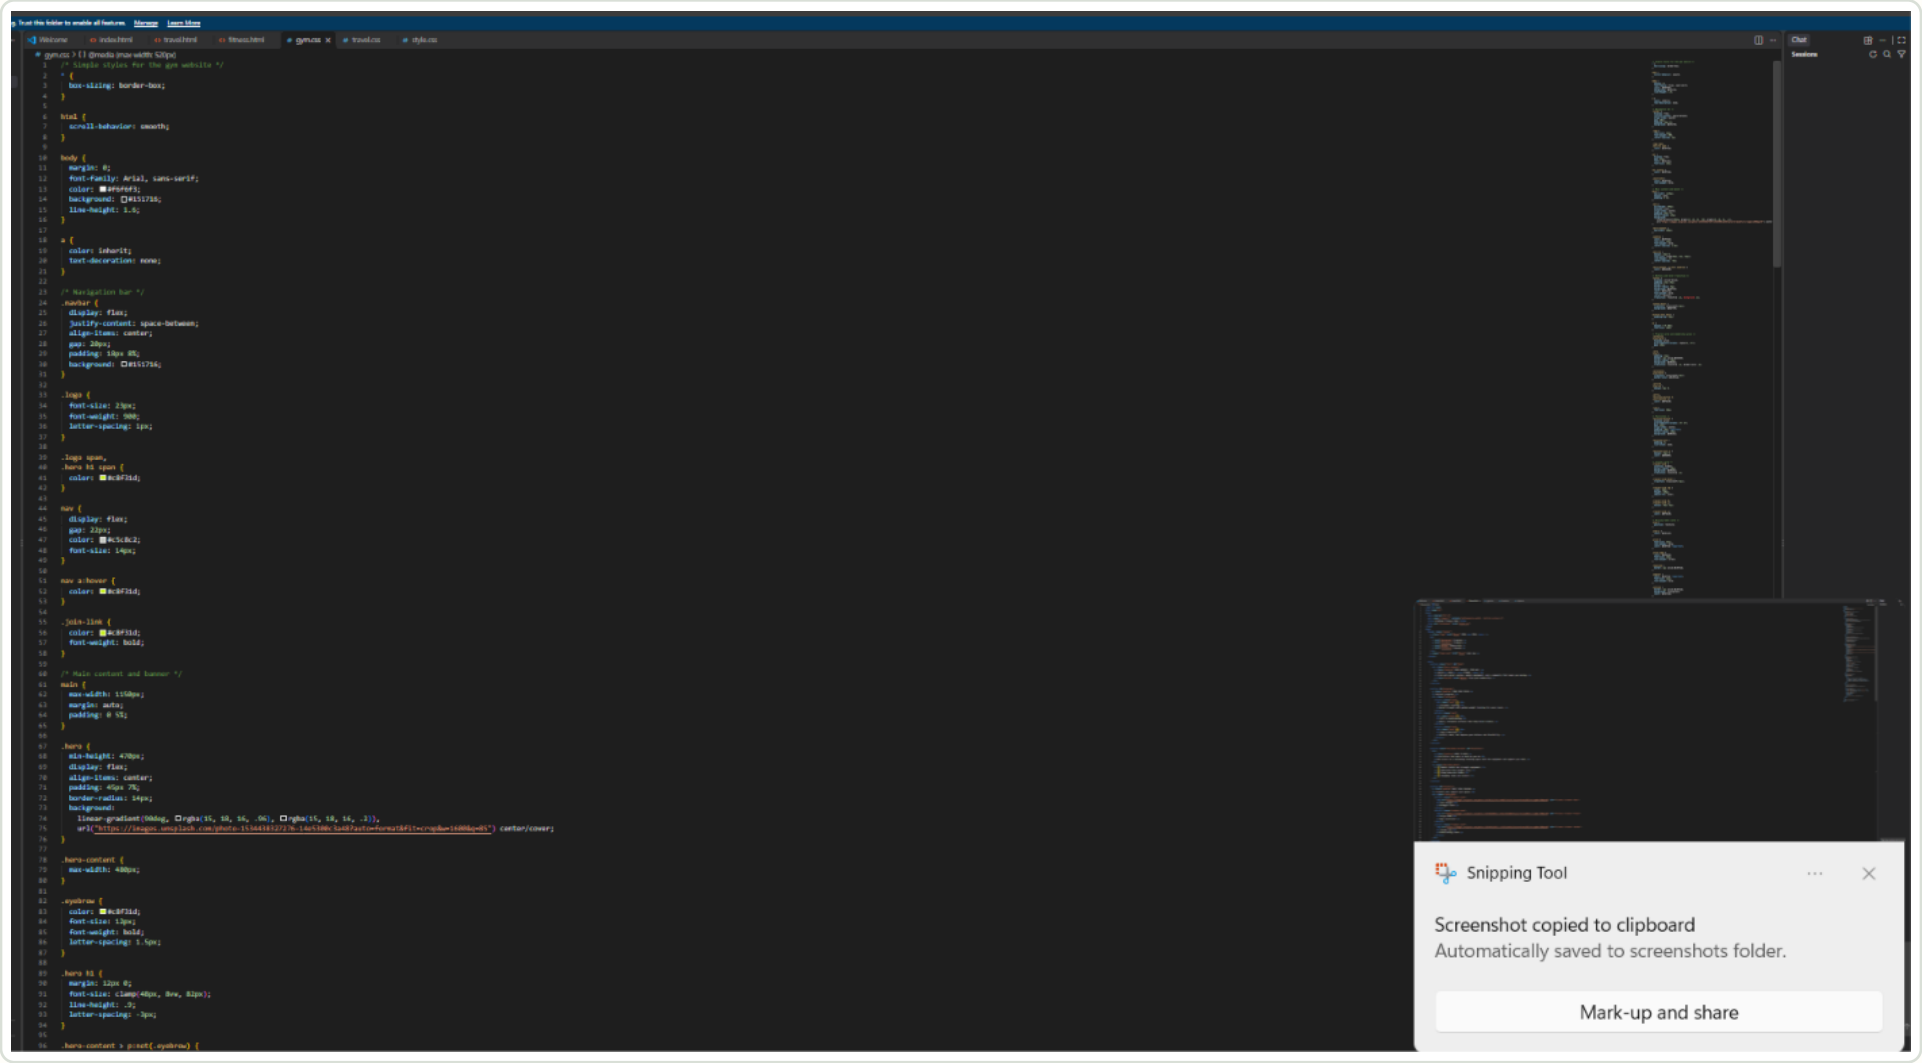

The screenshot begins the membership section and shows the Basic plan content. The rest of the page continues below the visible screen.

HTML elements used

header and nav create the top bar; section groups page areas; article groups a card; h1-h3 mark headings; p holds text; a creates links; img displays trainer photos; and ul/li create a list.

2. CSS Code Screenshot

The second supplied image shows the beginning of the IronPeak gym style.css file.

The visible CSS contains general page styles, navigation and logo styling, the main content width, and hero banner rules. The screenshot also includes a notification overlay at the lower right.

CSS Description - Rules and Elements

CSS selectors choose HTML elements or classes; properties set their appearance and layout.

* | Box sizing

Applies border-box sizing to all elements so widths include padding and borders.

html | Smooth scrolling

Sets smooth scrolling when a visitor follows a link to another section.

body | Page basics

Removes the default margin and sets the Arial font, text color, dark background, and line spacing.

a | Links

Inherits the surrounding text color and removes the default underline.

.navbar | Navigation bar

Uses flexbox to place the logo, navigation, and join link in a row with space between them.

.logo and nav | Branding

Sets logo size, weight, and letter spacing; colors the accent; and arranges navigation links with flexbox and gaps.

main and .hero | Main banner

Centers the page within a maximum width. The hero sets its height, padding, flex layout, rounded corners, background color, and gym photo.

.hero-content and .eyebrow

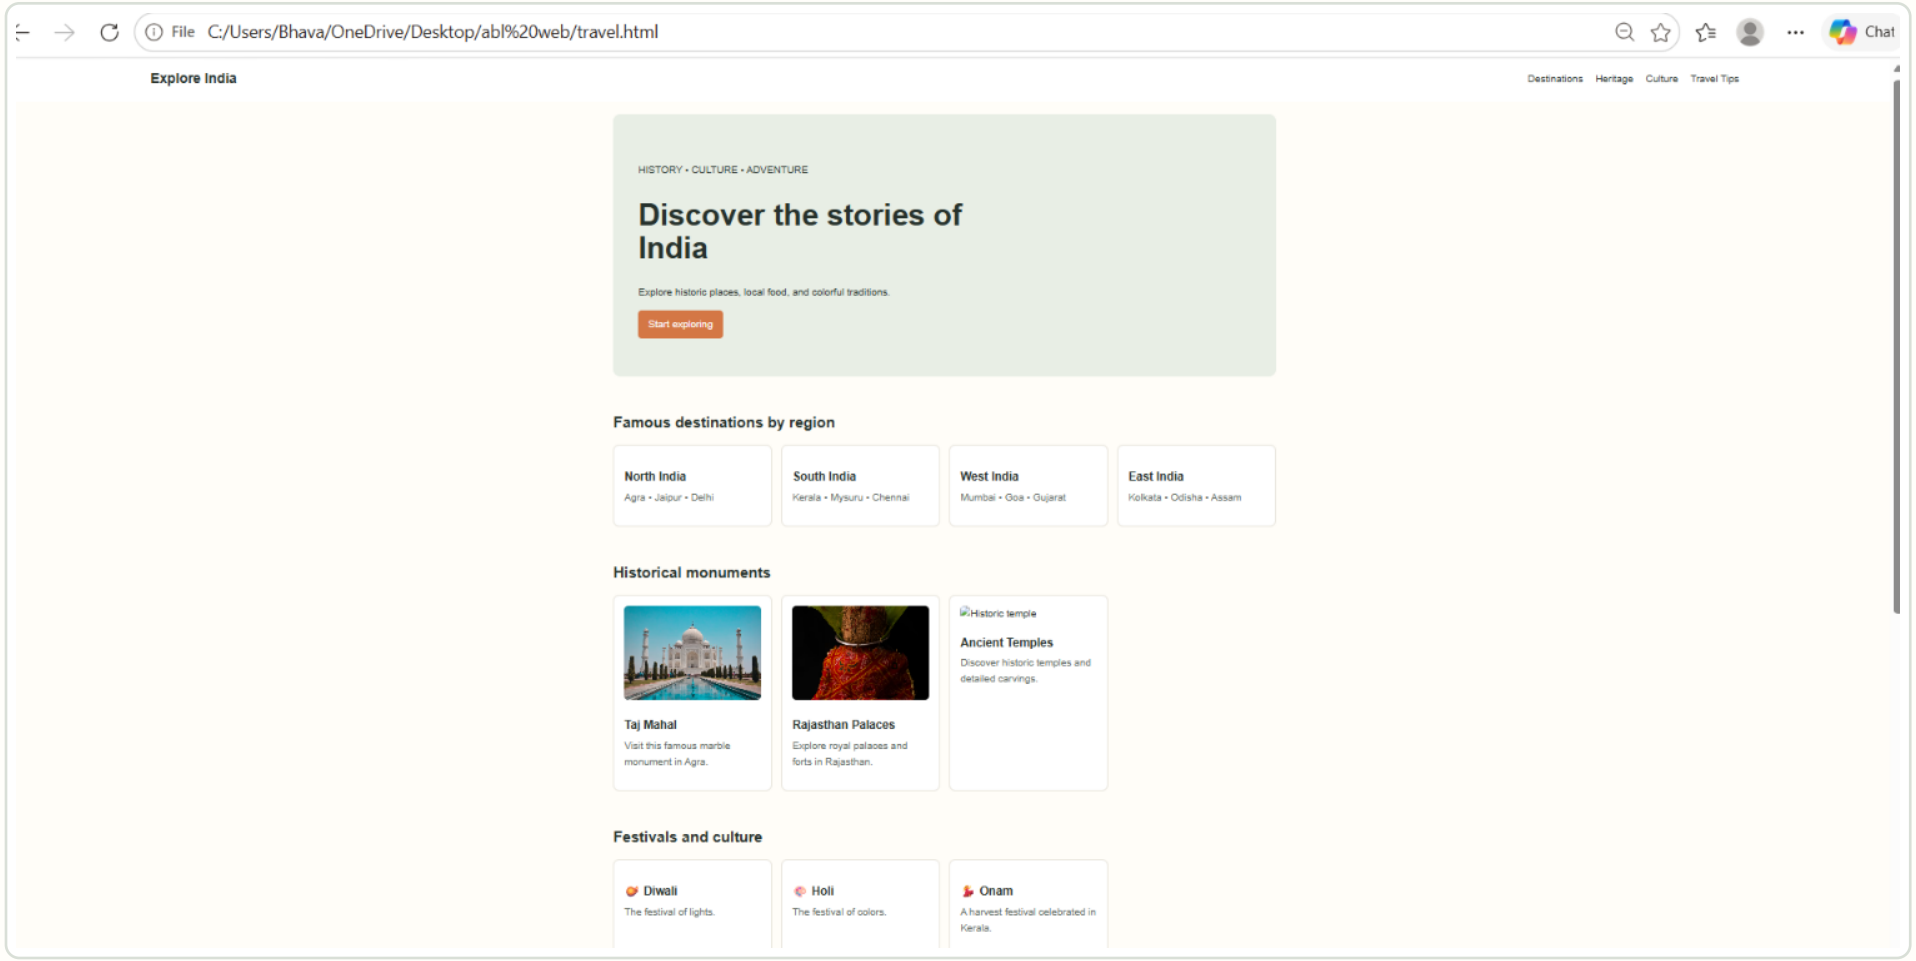

Limits the text width and styles the small uppercase label. The hero heading uses large responsive text and a bright accent color.

CSS PROPERTY EXAMPLES

display: flex arranges items in a row; gap adds space between items; background sets a color or image; border-radius rounds corners; and font-size changes text size.

3. Tourism Website Output

The third supplied image shows the Explore India page in a browser.

WHAT THE TOURISM OUTPUT SHOWS

The Explore India page has navigation links, a travel hero banner, four regional destination cards, historical monument cards, and festival cards. The screenshot ends partway down the page; one temple image appears not to have loaded.

Conclusion

What the supplied screenshots show

TRAVEL AND TOURISM OUTPUT

The Explore India page introduces destinations, monuments, and festivals. Its regional cards and travel-focused heading make the tourism topic clear.

CODE AND OUTPUT SCREENSHOTS DO NOT MATCH

The HTML and CSS screenshots show an IronPeak gym website. They are not the source code for the Explore India tourism output. A matching travel HTML screenshot and travel CSS screenshot are needed for an accurate line-by-line explanation of that tourism website.

SUMMARY

HTML organizes page content. CSS controls its colors, layout, and typography. A browser combines matching HTML and CSS files to display the final website.
