ShopEasy Online Shopping Website

The HTML screenshot contains the page structure and product information. The CSS screenshot contains the visual styling rules. The browser screenshot shows the completed shopping page.

IMPORTANT TITLE NOTE

The provided screenshots show an online shopping website named ShopEasy, not a fest management website. This report describes the website visible in the screenshots.

WHAT THE WEBSITE CONTAINS

HTML

The page title, navigation, sale banner, categories, and product cards.

CSS

Colors, spacing, fonts, backgrounds, layout, and visual emphasis.

OUTPUT

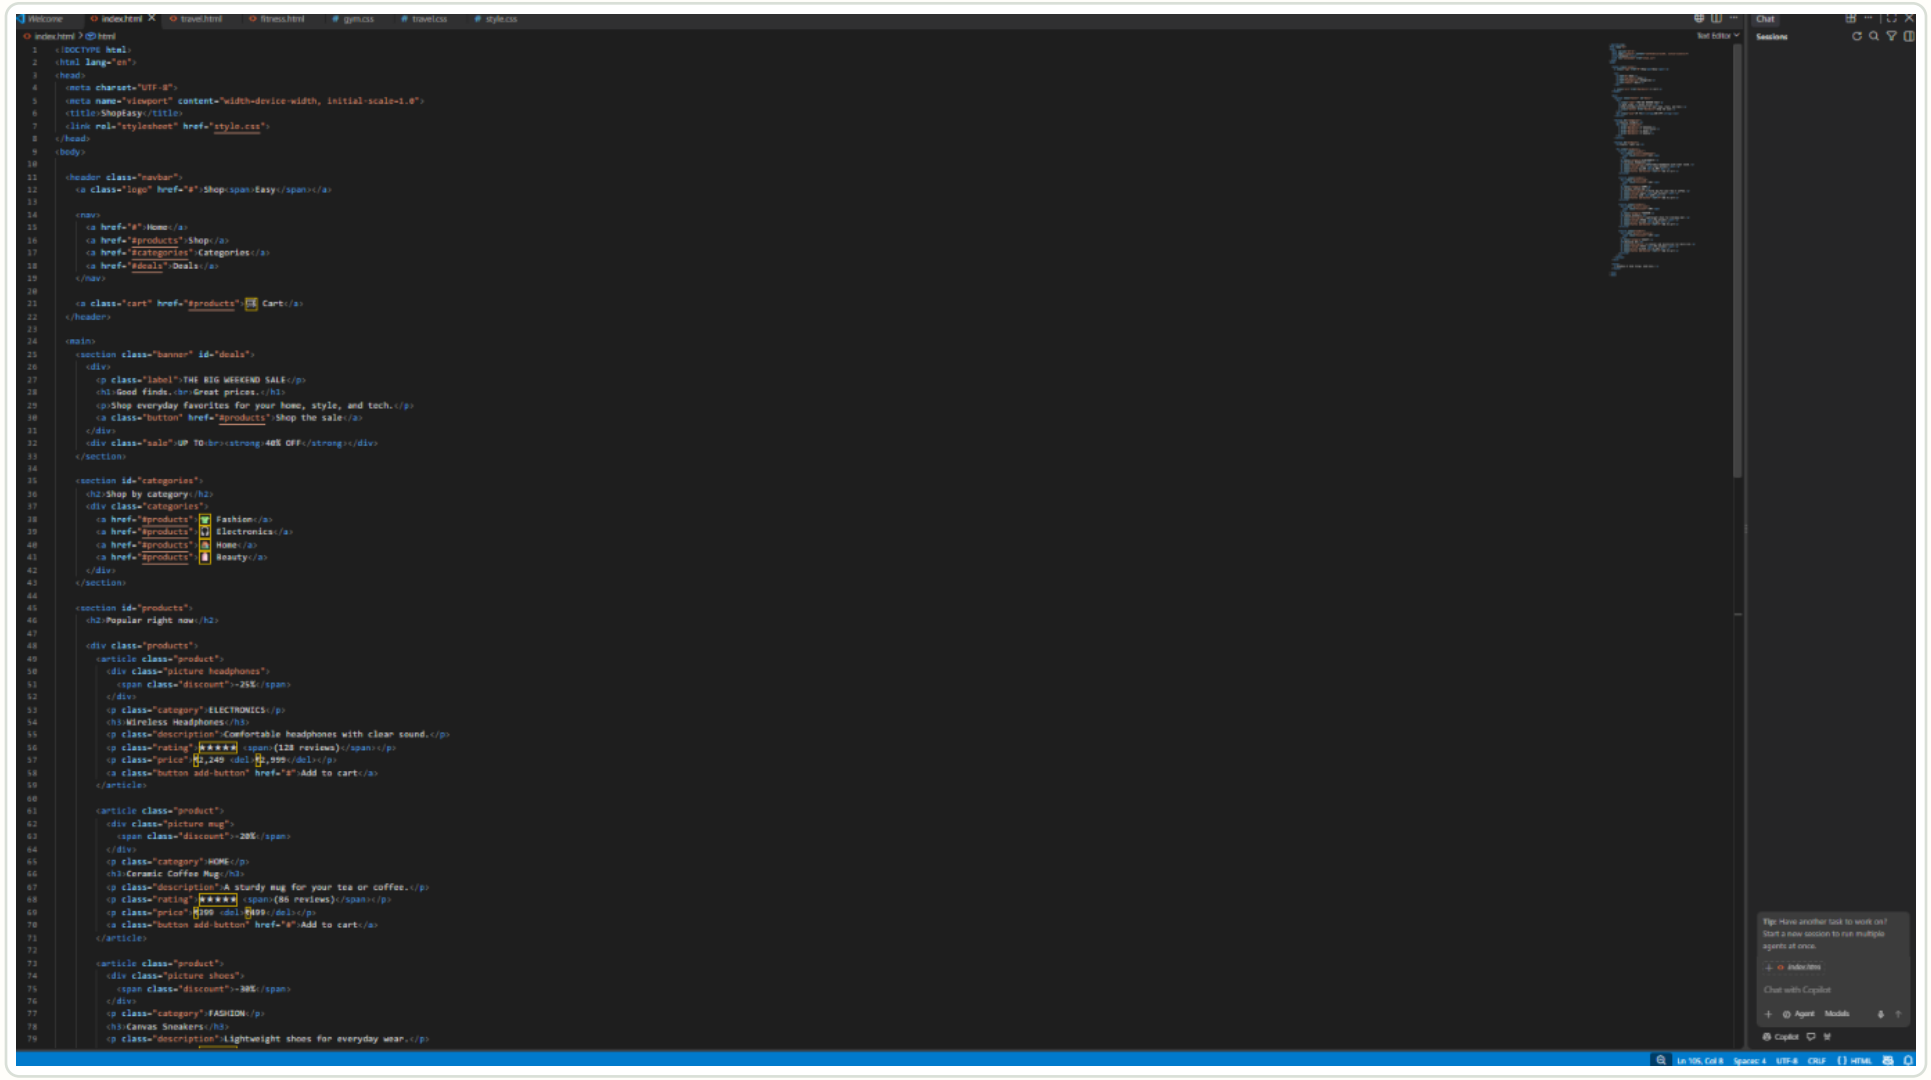

A shopping page with product photos, ratings, prices, discounts, and cart buttons.

TITLE DESCRIPTION

In the HTML code, the browser tab title is "ShopEasy". The main visible heading in the sale banner is "Good finds. Great prices." It introduces the store and its promotion.

1. HTML Code Screenshot

The first supplied image shows the ShopEasy HTML file in the editor.

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Shopeasy</title>
  <link rel="stylesheet" href="style.css">
</head>
<body>

  <header class="navbar">
    <a class="logo" href="#">Shop<span>Easy</span></a>

    <nav>
      <a href="#">Home</a>

            <span class="discount">-30%</span>
          </div>
          <p class="category">FASHION</p>
          <h3>Canvas Sneakers</h3>
          <p class="description">Lightweight shoes for everyday wear.</p>
```

The screenshot shows the document setup, navigation bar, sale banner, category links, and the beginning of the product list. The code is reproduced as supplied; the descriptions on the next page explain its visible sections in larger text.

HTML Description - Line by Line

Line numbers are approximate, following the visible line numbers in the screenshot.

Lines 1-8 | Page setup

DOCTYPE identifies HTML5. The html element sets English as the page language. The head contains character and mobile-view settings, the browser tab title, and the link to style.css.

Lines 10-22 | Header and navigation

The header creates the top bar. The logo links to the page start. The navigation links lead to Home, Shop, Categories, and Deals. A cart link displays the shopping cart.

Lines 24-33 | Sale banner

The main content starts with a promotional banner. It includes a sale label, the heading "Good finds. Great prices.", a short description, a Shop the sale button, and an up-to-40%-off badge.

Lines 35-41 | Categories

A section heading introduces categories. Links let visitors jump to product content for Fashion, Electronics, Home, and Beauty.

Lines 43-59 | Headphones product

A product article groups the headphones image area, discount, category, name, description, star rating, review count, sale price, old price, and Add to cart link.

Lines 61-70 | Mug product

A second article uses the same structure for a ceramic mug. Reusing the structure keeps product cards consistent.

Lines 72 onward | More products

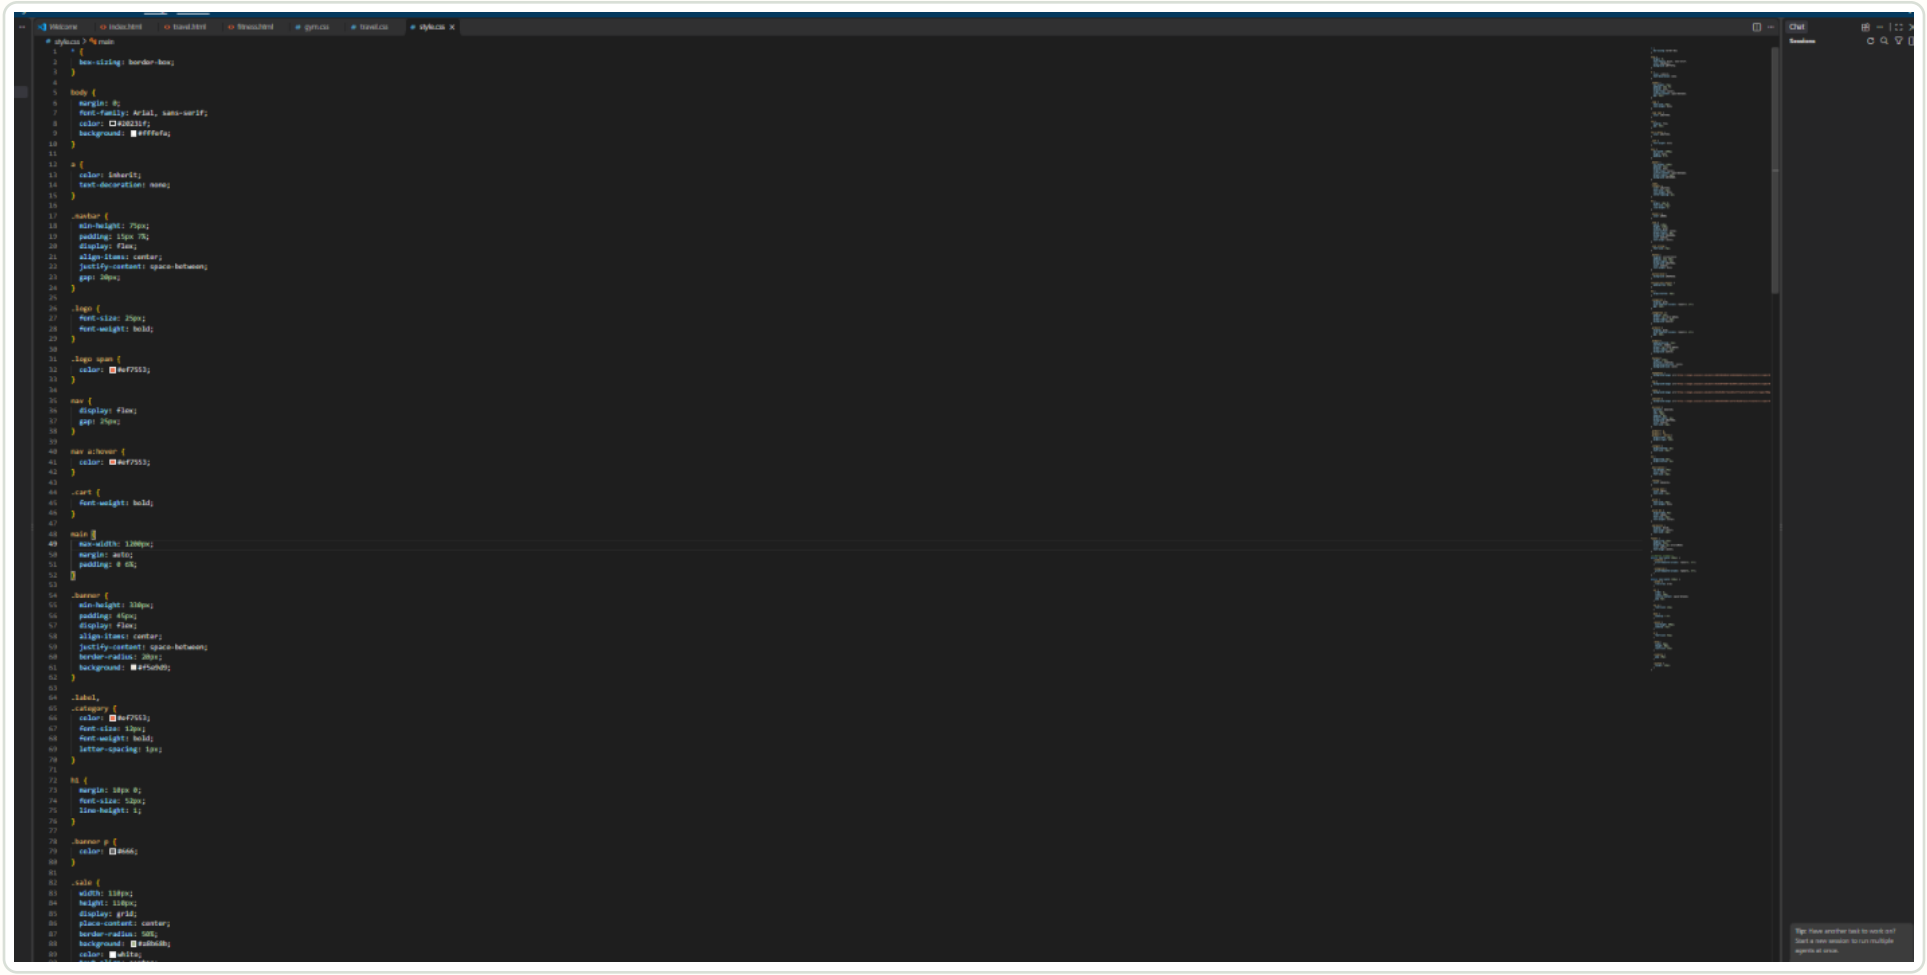

The screenshot begins a sneakers product card. The visible browser output also shows a skincare card. Each card presents product details and a shopping button.

HTML elements used

header and nav organize the top bar; main and section group content; article represents a product; h1-h3 provide headings; p holds text; a creates links; span marks small labels; and div groups items for styling.

2. CSS Code Screenshot

The second supplied image shows the beginning of the style.css file in the editor.

```
* {
  box-sizing: border-box;
}

body {
  margin: 0;
  font-family: Arial, sans-serif;
  color: #181c14;
  background: #fffefa;
}

a {
  color: inherit;
  text-decoration: none;
}

.navbar {
  min-height: 75px;
  padding: 15px 7%;
  display: flex;
  align-items: center;
  justify-content: space-between;
  gap: 20px;
}

.logo {
  font-size: 25px;
  font-weight: bold;
}

.logo span {
  color: #ef7553;
}

nav {
  display: flex;
  gap: 25px;
}

nav a:hover {
  color: #ef7553;
}

.cart {
  font-weight: bold;
}

main {
  max-width: 1200px;
  margin: auto;
  padding: 0 6%;
}

.banner {
  min-height: 310px;
  padding: 45px;
  display: flex;
  align-items: center;
  justify-content: space-between;
  border-radius: 20px;
  background: #ffe5d9;
}

.label,
.category {
  color: #ef7553;
  font-size: 12px;
  font-weight: bold;
  letter-spacing: 1px;
}

h1 {
  margin: 10px 0;
  font-size: 52px;
  line-height: 1;
}

.banner p {
  color: #666;
}

.sale {
  width: 110px;
  height: 110px;
  display: grid;
  place-content: center;
  border-radius: 50%;
  background: #e85d3b;
  color: white;
```

The visible CSS defines general page rules, the navigation bar, logo, links, content width, sale banner, headings, and sale badge. Some lower rules are outside the screenshot, so this description focuses on what can be seen and on the styling visible in the browser output.

CSS Description - Elements and Rules

CSS selectors choose HTML elements or classes; declarations set how those elements look.

* | Box sizing

The universal selector applies box-sizing to all elements. This makes widths and padding easier to manage.

body | Page appearance

Sets the font, text color, background color, and removes the browser default outer margin.

a | Links

Sets link color and removes the default underline.

.navbar | Top bar

Uses flexbox to place the logo, navigation links, and cart across one row with spacing.

.logo and nav | Branding

Changes logo size and weight, colors the brand accent, and spaces the navigation links.

.main | Page width

Limits the page width and centers it, with padding at the sides.

.banner | Promotion area

Sets banner height, padding, and flex layout so the offer text and sale badge sit beside each other.

.label, h1, .sale | Visual emphasis

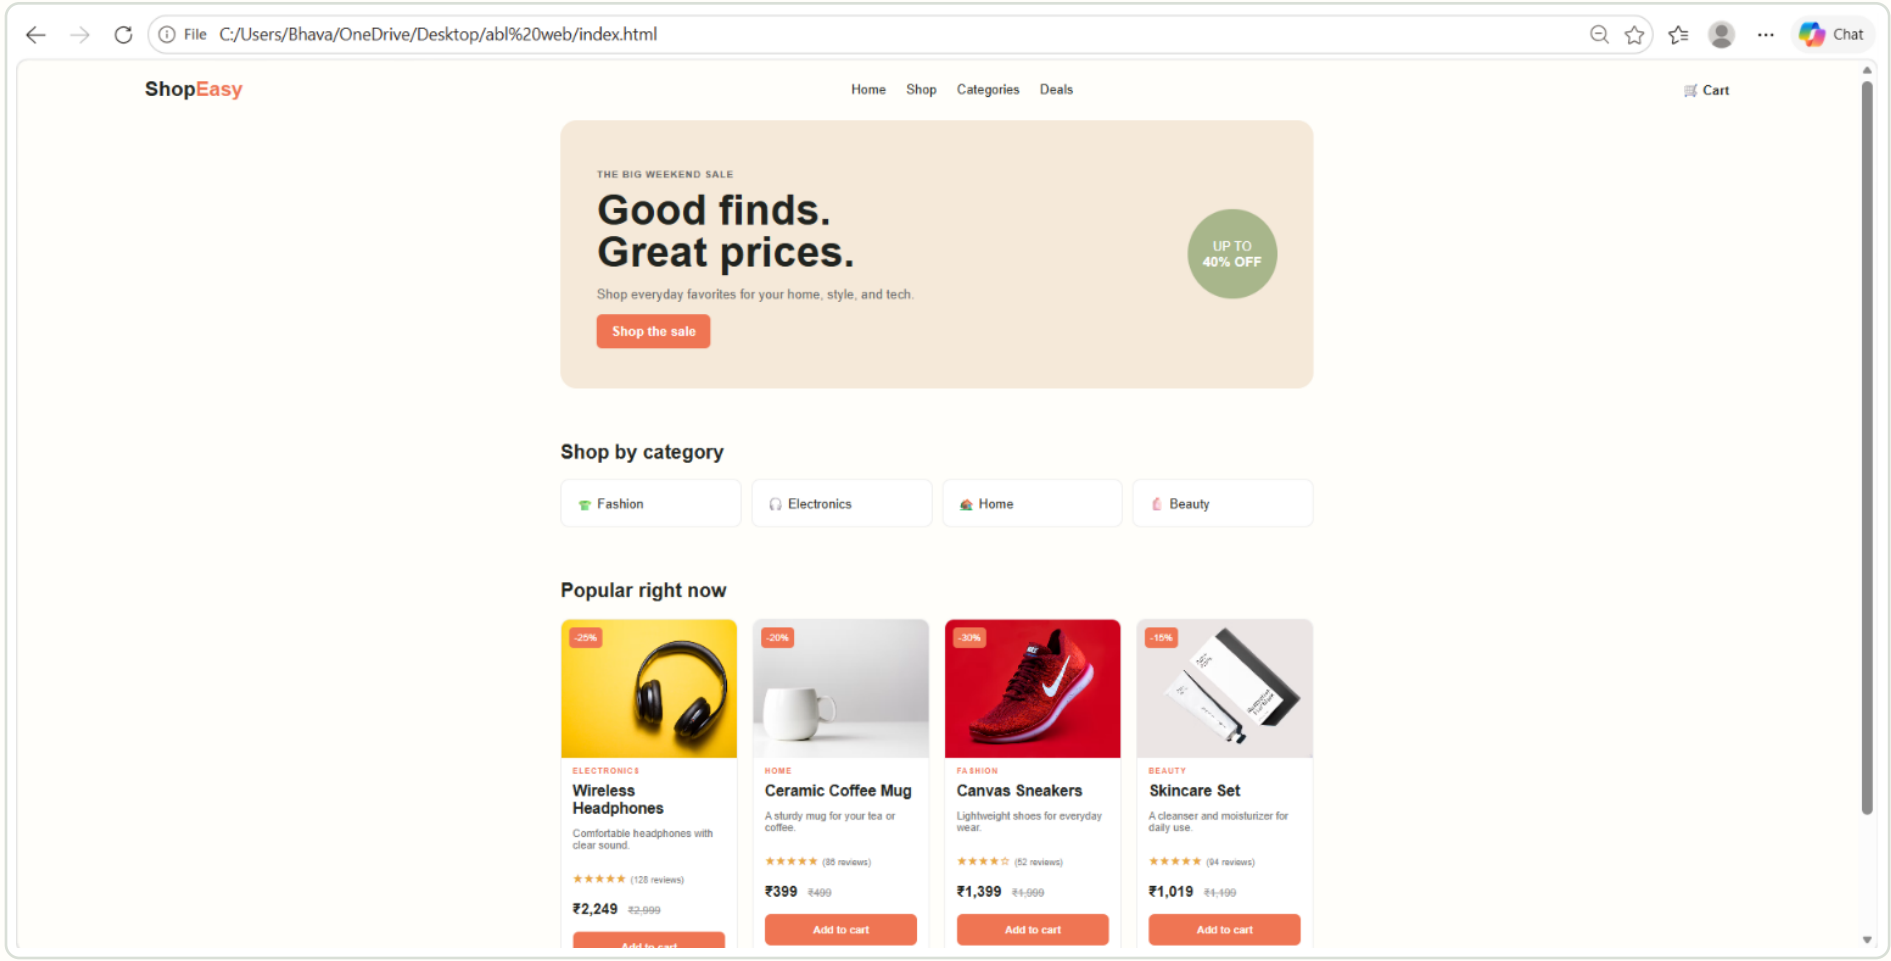

Styles the small sale label, large headline, and round discount badge. Color, font size, alignment, and rounded corners help them stand out.

CSS PROPERTY EXAMPLES

display: flex arranges items in a row; gap adds space between them; background sets a color or image; border-radius rounds corners; and font-size changes text size.

3. Website Output and Conclusion

The third supplied image shows the website opened in a browser.

CONCLUSION

The screenshots demonstrate how HTML provides the content and structure of a website, while CSS controls its appearance and layout. Together, they create a ShopEasy storefront with a promotion, category links, product images, discounts, ratings, prices, and Add to cart buttons. The provided screenshots show an online shopping topic, rather than a festival management website.
